

Whether you are soaking in a hot bath, waking up cozy on a cold morning or enjoying a book in front of a Natural Gas fireplace, your comfort depends on warmth and reliability. No matter how it is used, Natural Gas provides you and your family with an energy source that is both abundant and accommodating. If you want to do what's right for the environment while enjoying the comforts of home, look to clean-burning **NATURAL GAS**.

# take comfort... NATURAL GAS

Brought to you by... **NORTH BALDWIN UTILITIES**

**WATER HEATING:** Hot water is what you get. Natural Gas can heat water quickly and more efficiently. In fact, a gas water heater can heat water up to twice as fast as an electric one so your family always has hot water when they need it most. So, whether it is time to take a shower, wash dishes or do laundry, Natural Gas is comfortable and reliable.

**HEATING:** A Natural Gas furnace produces air that is up to 25° warmer than the air from an electric heat pump system. Only 30% of the energy used in producing electricity actually reaches your home, whereas up to 90% of the Natural Gas that is produced is delivered as potential energy to your home.

**TANKLESS WATER HEATING:** For even more efficiency, consider a Natural Gas tankless water heater. A tankless water heater only heats the water when you need it. The investment in a tankless water heater can pay you back in just a couple of years.

**COOKING:** These days, the kitchen is the centerpiece of many homes. Natural Gas provides even heat and temperature control as it is always ON, even during a power outage. It costs about half as much to cook with Natural Gas as compared to electricity.

**LAUNDRY:** For drying, nothing beats the comfort, savings and conservation of Natural Gas. Natural Gas dryers work by moving warm air through the clothes. On average, you can dry two loads of clothes for the same amount it would cost you to dry one load in an electric dryer.

**FIREPLACE:** Natural Gas fireplaces are available in a range of styles to suit your home's décor. They serve as a great source of supplemental heat without cutting down trees, hauling wood or cleaning up soot. With a ventless fireplace, you can enjoy the ambiance in any room in your house.

## Your Gas Appliance Allowance:

Energy Efficient 40/50 gallon Water Heater*	FREE
Energy Efficient Tankless Water Heater	\$350
Gas Heating, Minimum Rating 50,000 BTU	\$300
